

Policy Document

EFTPOS Policy_v1.0

Definition:

EFTPOS - Electronic Funds Transfer at Point of Sale

Rationale

EFTPOS facilities provides schools with the ability to accept non-cash/cheque electronic payments by way of credit and debit card transactions.

Objectives

Use of EFTPOS allows Stonnington Primary School to increase the options and convenience provided to parents/debtors, as well as improves security by reducing the amount of cash handled and kept on school premises.

Implementation

- The Principal will be responsible for ensuring that staff operating the merchant facility are made fully aware of security and privacy requirements, and that all data obtained through processing EFTPOS transactions remains safe from fraud.
- Staff authorised to process transactions should be minuted at School Council and entered into a Register.
- The use of EFTPOS as a means of collecting funds will require schools to acquire and retain customer information. Schools must do so in accordance with *Schedule 1 of the Victorian Information Privacy Act 2000*.

Internal controls

- Refer to the publication, *Internal Control for Schools* for information regarding internal control measures applicable to receipting.
- The internal controls that need to be considered in relation to EFTPOS include:
 - Proper authorisation and approval of the initial setting up of the facility by School Council
 - Physical security of EFTPOS machines
 - The number of terminals that will be installed
 - Documentation kept by the school confirming all transactions such as merchant copies of EFTPOS receipts, voided receipts, daily EFTPOS reconciliation reports, authorisation details, relevant CASES21 reports
 - The appropriate segregation of duties to ensure and maintain the security, accuracy and legitimacy of transactions
 - Establishment of an EFTPOS user register outlining the name of the school user, their unique ID and the EFTPOS functions they are authorised to perform
 - Staff familiarisation with the EFTPOS facility's functionality and User Guide provided by Financial Institution

Policy Document

- Register of void transactions
- Setting of minimum and maximum refund transaction limits
- Reconciliation of monthly EFTPOS statement received from the school's financial institution with CASES21 transaction records
- Reconciliation of daily EFTPOS settlement statements with CASES21 transactions.

EFTPOS Terminals

- The Schools EFTPOS terminal(s) are connected to the bank via phone connection.
- Terminals are located in a secure location which will allow for no unauthorised usage, and ensure privacy for PIN transactions.
- Appropriate procedures are implemented to ensure the security of the terminals during operation and when they are not in use.

Processing Transactions

- The School only processes transactions to accept school invoice payments i.e. family charges, sundry debtors, trading operation payments etc. The School does not undertake transactions which provide 'cash' to the customer as part of the transaction.
- The School also uses the EFTPOS facility to process transactions for [uniforms and approved fundraising activities](#).
- The maximum amount of a credit/debit card transaction is determined by the cardholder's limit.
- When processing a credit card transaction that requires a signature for authorisation; the School ensures that the signature obtained on the merchant receipt matches the signature on the card and that the signature panel has not been altered in any way.
- When processing a credit card transaction that requires the entry of a PIN, customers should be able to enter their PIN without risk of disclosure, and the PIN is never be recorded by the school.
- Schools should ensure that the card number that is embossed on the card is free from alteration and that the card has not expired.
- Receipts are entered onto CASES21 at the time the EFTPOS transaction is processed and both original receipts (EFTPOS and CASES21) issued. In circumstances where this is not possible, a manual school receipt will be issued at the time, with the CASES21 receipt forwarded when it is entered on to the system. An authorised officer reconciles all manual receipts to CASES21 to ensure all funds received by the school are receipted at the end of each day prior to the batch being entered and updated.
- The School always prints both the merchant and customer copies of the receipt for both credit and debit card transactions, and retains the merchant copy for audit purposes.

Incorrect Transaction Processing

- If it is determined at the time of the transaction and **prior to entering the receipt on CASES21**, that an error has occurred, for example an incorrect amount is processed, the School should "void" the transaction **via the EFTPOS terminal**. The authorised officer will refer to the instructions provided in the EFTPOS facility user guide to ensure that this is processed correctly.
- Key internal controls relating to the reversal of incorrect EFTPOS transactions include:

Policy Document

- Void transactions must be processed on the same day as the original transaction. After that period it must be treated as a refund as per the procedures under 'Refunds' included in these guidelines
- All documentation relating to the original transaction must be obtained
- The void transaction must be signed by the cardholder
- Copies of both the original and voided transactions should be retained for audit purposes
- The school copy should be signed by the authorised officer and where possible this should not be the operator who processed the original receipt. The transaction details should be recorded in an EFTPOS 'void transaction' register.

Banking

There are three factors schools will need to consider when determining how to process EFTPOS receipts in CASES21 Finance either via a normal receipt batch that contains cash and/or cheques, or as a separate EFTPOS only receipt batch. These factors are:

- A Settlement* must be run on the EFTPOS terminal at the end of each day
- The volume of EFTPOS transactions undertaken by the school
- How often banking is undertaken.

Below is the option that Stonnington PS adopts to process our EFTPOS receipts.

Option 2

- Schools include EFTPOS receipts in a normal receipts batch with cash and/or cheque receipts that is updated at the end of each day. This option helps to reduce the number of batches opened each day.
- The Settlement* on the terminal is also performed at the same time as the batch is updated. The *EFTPOS* total (Batch total less Bank Deposit Slip total) should match the Settlement* total (unless adjustment is required for a refund)
- *On the Bank Reconciliation, the EFTPOS total for that date should match the direct credit amount paid by the bank.*

Stonnington PS performs the settlement process where the days EFTPOS transactions are closed off for the day and a total is determined. It is **strongly recommended that school performs settlement each day at a time determined by the school.*

Information to be retained by school

Schools should retain the following information in relation to use of an EFTPOS facility:

- Minutes of School Council meeting approving the use of the facility
- EFTPOS policy approved by School Council
- Register of voided transactions
- Merchant copies of EFTPOS terminal receipts, voided/cancelled receipts and settlement documents
- Applicable CASES 21 Reports

Policy Document

- Daily EFTPOS reconciliation reports and documentation in support of any adjustments.
- Current authorised users of the EFTOPS terminals as per the EFTPOS authorised user register

Evaluation

- This policy will be reviewed as part of the school's four-year review cycle.

Ratification

Ratified by School Council: May-2014

School Council President: Glen Noble

Principal: Anne McPhee
